TOTAL ESTIMATED VOLUME				13.34 m³

Calculated estimated total volume: 13.34 m³. Allowing for packing tolerance and the additional miscellaneous items mentioned, approximately 15-17 m³ of transport capacity is recommended for quotation and planning purposes.

Important: This packing list is an approximate volume calculation prepared without photographs, exact measurements or an on-site survey. The final volume may vary depending on how the furniture is dismantled and packed, the actual dimensions of the corner sofa modules and swing, and the final number and size of cartons. Final volume should be confirmed after packing or a physical survey.

Volumes are estimated on a gross transport-volume basis. Weight is not included in this packing list.
